### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Jones on February 11, 2005.

The application has been amended as follows:

In paragraph [0001], line 2, -,now patent 6,708,636, - has been after "filed February 21, 2003".

In paragraph [0068], line 5 "is" after "framing height" has been deleted.

In claim 22, line 4, "said" has been changed to -a- as "said new inner bottom hull" has no clear antecedent.

2. The prior art made of record by the examiner and not relied upon is considered pertinent to applicant's disclosure.

Hagner is the parent patent of the instant application.

Menon is cited because a method of providing a second hull to a ship is disclosed.

Stuart is cited as Stuart discloses a method of constructing or modifying a watercraft in which an outer hull is fitted to a main hull.

Japan 3-159895 is cited because the additon of a new outer shell to a ship is disclosed.

Japan 53-40995 is cited because an oil tanker is modified by utilizing cut material at an inlet to the hold of the tanker to form an inner bottom plate.

Japan 58-71288 is cited as a work holed is made through an upper deck of a ship through which a double hull bottom is formed.

Japan 58-174078 is cited because an oil tanker is disclosed as being reconstructed by using the material from a cutout in the upper deck to form a double bottom.

3. The following is an examiner's statement of reasons for allowance:

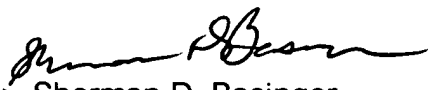

Claims 1 and 22 and the claims depending therefrom are allowed because none of the art of record taken alone or in combination suggest or fairly teach a method of rebuilding an existing single hull tanker into a rebuilt double hull tanker in which an outer bottom hull is formed from an existing outer bottom plating, a new inner bottom hull is formed by installing new inner bottom plating internally over the existing outer bottom plating, inner side hulls are formed from existing inner side plating, and new outer side hulls are formed from new outer side plating installed externally over said existing inner side plating.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sherman D. Basinger whose telephone number is 703-308-1139. The examiner can normally be reached on M-F (6:00-2:30 ET)/5:30-2:00(after 4/11/05).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel J. Morano can be reached on 703-308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
